Smyrnavej 13b, 1tv, 2300 København S, Denmark.

Professional Profile

I'm an interested student, a hard worker and a go-getter. I like to get things done, but I also like to get them done right. I love new experiences, to be challenged and to learn.

I have experience with every step of the software project process, from requirements elicitation and business cases, through development, and to deployment and user testing. I am both capable of working on complex coding tasks, as well as being a part of building the bridge between client needs and software features. This experience comes from both theoretical knowledge of software, project management and business analysis, and from practical experience of building software solutions in teams.

Timeline

Education

2001-2011

Hobbies & Pastime

Music

Music is my passion. I play guitar, piano and sing, and I am currently working on producing my own music.

Volunteer Work

I have done a lot of organizational volunteer work at ITU. Throughout my years I was the treasurer of the university's Café, Analog, Chairman of the LAN organization, a tender of the bar, ScrollBar, and a member of the choir.
